## ***Food Waste Collection***

Bend Garbage & Recycling offers a food waste collection program for commercial businesses within the Bend city limits. This program gives our commercial customers another opportunity to further reduce their waste, recycle more and keep organic waste out of the landfill.

***It's easy; fill your food waste cart with any food waste material including meat, produce, dairy and bakery items and we'll empty and rinse the cart at least once a week.***

The material goes to Deschutes Recycling where it will be processed into nutrient-rich compost.

## ***Service***

We offer 65-gallon roll carts to collect your food waste material. We can provide as many carts as needed.

Carts are serviced once or twice weekly, depending on your needs. Increased frequency options are available upon request. Carts are rinsed clean each time they are serviced.

## ***Fees***

The monthly fee will depend on the number of carts and the frequency of service.

Contact Bend Garbage & Recycling at 541-382-2263 and we will schedule a representative to meet with you to determine the best program to fit your needs.

## **Completing the Cycle**
